

Desktop Optimisation Desktop Management

Microsoft System Center Configuration Manager 2007 Plan, Design & Deploy Service

Systems Centre Configuration Manager 2007 provides a comprehensive solution for addressing an organisation's change and configuration needs.

SCCM 2007 enables an organisation to:

- Deliver critical business applications reliably and easily to users in the right place at the right time, and ensure compliance through software inventory & metering
- Improve security of the Windows environment through increased vulnerability awareness and reliable targeted delivery of updates
- Assess compliance of computers using Desired Configuration Management (DCM) against a set of established baseline configurations
- Deploy desktop and server operating systems from any state, including bare-metal deployment, including Windows 7 and Windows Server 2008 R2 when Service Pack 2 is applied.

In Scope

- Requirements analysis with key stakeholders
- Review current desktop/server infrastructure and management toolset (if applicable)
- Design Site Hierarchy requirements
- Design Site Server Component requirements
- Design Client, Security & Reporting requirements
- Design Operations & Maintenance requirements
- Write SCCM Design Document
- Deploy SCCM Server in pilot environment
- Deployment of SCCM client to a pilot set of clients within the Primary and deployed Secondary Sites, according to a detailed client deployment strategy
- Test per Closed Pilot Test Plan
- Signoff Closed Pilot
- Remediate Pilot environment (if required)
- Test per Open Pilot Test Plan
- Signoff Open Pilot
- Migrate Open Pilot users to proposed solution
- Implement SCCM (central site and two remote sites) in production & configure per design
- Remaining sites can also be deployed by Data#3 or customer staff, following knowledge transfer and on-site training
- Knowledge transfer to on-site staff throughout the engagement.

Out of Scope

- Anything that is not specifically within the scope section of this service

Deliverables

- SCCM 2007 Detailed Design/As-Built Document
- Acceptance Test Plan
- Knowledge Transfer
- Deployment of central site SCCM Solution per scope section
